

HEAVY PEATED DISTILLING MALT

SCOTTISH
SMOKE

We produce this malt at our Pauls Malt Ltd. plant in Glenesk, Montrose, Scotland. With heavy levels of phenols from locally sourced Scottish peat, it can be used in smoked porters and ales.

Peated Malt is made using the same malt production regimes as (plain) distilling malt, with the reek of the peat from the peat furnace passing through the kiln bed.

PARAMETER	IOB
MOISTURE	4.8% Max
PHENOLS	50ppm Min
PREDICTED SPIRIT YIELD	408 l/Tonne Min
TOTAL NITROGEN	1.6% Max
SOLUBLE NITROGEN RATIO	38 Min
